SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	In general Ok, but as the authors are from Nigeria, it was disappointing that no local data were included, there are publications from the Middle East, Iraq and Iran, whereby the incidence of benign hyperplasia and prostatitis mean that in the PSA range 4-10 the incidence of prostate cancer is much lower when compared to US and European data, for reasons genetic and environmental. To improve the article, I feel this material should be included, the differences of the Nigerian population from Afro-american, and if possible if there are data from rural versus urban populations	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
