

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of Biochemistry Research & Review
Manuscript Number:	Ms_IJBCRR_26324
Title of the Manuscript:	Severity of monosodium glutamate in liver of sprague-dawley rats
New title:	Effects of chronic consumption of monosodium glutamate in Sprague Dawley rats' liver
Type of Article:	

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
In this new version of the paper, authors introduced changes which improved understanding of the work. However, there are some corrections suggested : - Results shown in Table 2, correspond to the activities of the enzymes and not to the expression; therefore, in Results and Discussion the 2nd paragraph, 2nd line: "expressions of transaminase enzymes, should be changed for: " enzymes transaminase activities". - In the legend of Table 2, the meaning of the abbreviations of measured parameters (and not groups), should be added; for example: Aspartate aminotransferase (AST- 139 µKat/L); Alanine aminotransferase (ALT- µKat/L); Albumin (ALB-µmol/L); Total protein 140 (TP-g/L); Globulin (GLOB-g/L); Cholesterol (CHOL-mg/dL), Glucose (GLU- mmol/L); 141 Bilirubin (BIL-µmol/L). The manuscript is suitable for publication after Minor modifications and corrections.
