

## SDI FINAL EVALUATION FORM 1.1

### PART 1:

|                          |                                                                                                                                                                                                    |
|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Journal Name:            | <a href="#">International Journal of Biochemistry Research &amp; Review</a>                                                                                                                        |
| Manuscript Number:       | Ms_IJBCRR_26369                                                                                                                                                                                    |
| Title of the Manuscript: | The inhibitory potentials of seed kernel methanol extract of Mangifera indica L. anacardiaceae and fractions on metalloprotease-induced toxic effect from Echis ocellatus venom                    |
| Neew title:              | The inhibitory potentials of seed kernel methanol crude extract and fractions of Mangifera indica L.<br><br>Anacardiaceae on metalloprotease-induced toxic effect of <i>Echis ocellatus</i> venom. |
| Type of Article:         | Original Research Article                                                                                                                                                                          |

### PART 2:

| FINAL EVALUATOR'S comments on revised paper (if any)                                                                                                                                                                                                                                                                                                                                                                                                                                             | Authors' response to final evaluator's comments |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------|
| <p>Please review again to include the following corrections.</p> <p>Recast abstract to follow journal specification under the following headings:<br/>Aims<br/>Study design<br/>Place and duration of study<br/>Methodology<br/>Results<br/>Conclusion</p> <p>Line 44: Flavonoids not <b>Flavanoids</b> (Under Introduction Section)<br/>Line 67: Envenomed not <b>Eenvenomed</b> (Under Animal Grouping Section)<br/>Line 116: Physical signs <b>of</b> envenomation (Under Result Section)</p> |                                                 |
