SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	This is an interesting manuscript but it needs further improvements. Please clarify the Ethical issue, if any.	
Minor REVISION comments	1- It is necessary to improve the title of the tables. More details are necessary. 2- <i>B orellana</i> in the legend of the tables should be <i>B. orellana</i>. 3- It is necessary to include the definition of "P" in the legend of the tables. 4- Figures must be redone. It is difficult to see information in them. For example, In Figure 2 the horizontal line is hidden in Figure 1 and the words "mean value" numbers are mixed to the numbers in the vertical line. 5- Authors need to use newer references in the manuscript, mainly when talking about diabetes, oxidation of the glucose and oxidative stress. Articles released in 2016 should be used. 6- I also suggest authors to include more references in the discussion section in order to improve the information and comparison provided in this section.	

SDI Review Form 1.6

	7- The reference to the model of Morris et al is not in the reference section and there is no reference to the year of this publication in the text. 8- Please, check the citation of the references in the text and in the reference section.	
<u>Optional/General</u> comments	After getting all the necessary modifications.
