Ethical approval

Title of the project: Biochemical studies about liver diseases.

Name of principle investigator: Elsayed Gomaa Elsayed Elsakka.

Department: Biochemistry department, faculty of pharmacy, Alazhar University.

Place of the investigation:

1. Animal facility at pharmacology department, faculty of pharmacy, Alazhar University.
2. Biochemistry department, faculty of pharmacy, Alazhar University.

Affiliation of the Principle Investigator: Biochemistry department, faculty of pharmacy, Alazhar University

Name (s) of the Supervisors / Co- investigator (s):

Prof. Gamil Mohamed Abd Allah

Dr. Ahmed Mohammed Ibrahim Mansour

Dr. Ahmed Ibrahim El-Desouky Mahmoud

Type of research: Animal Experimental Study

List the potential benefits to the subjects:

1. Probability of investigation of new useful drugs in management of liver diseases.
2. Probability of investigation of new markers that help in diagnosis and/or prognosis of liver diseases and being as a target for drug actions

The research is for the good of society: yes

May discover to new trends in diagnosis and treatment of liver diseases

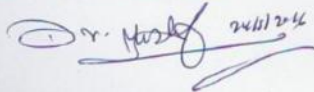

Facilities For The Research Are Available In Your Department: highly prepared animal house.

Funding/Support and role of the sponsor: funding is achieved by the principle investigator.

Final decision: the research is ethically approved

Date: 22 /5 /2016
