PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	It is essential that the authors confirm that the error term in the tables is SEM not SD. The error term is very high. The criteria for the division of the cattle should be described in detail.	1. We used SD which is usually twice the value of SEM so that is instructive. SD should ideally be higher than SEM

SDI Review Form 1.6

<u>Minor</u> REVISION comments		2. We did not have our own cattle but we went to the abattoir to sample cattle to assay the parameters we reported, so for every parameter, how many animals we got at a time was the criteria
<u>Optional/General</u> comments
