

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of Biochemistry Research & Review
Manuscript Number:	Ms_IJBCRR_30202
Title of the Manuscript:	A Novel Non-Invasive Approach to Detect Cellular Signals of Oxidative Stress due to Extreme Environmental Temperatures in Backyard Broiler from Arid Tracts in India
Type of the Article:	Research paper

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
As per my earlier Reviewer comments with specific to the query no.1: The title indicated that the works carried out in the backyard poultry... but in the materials & Methods used WLH?. Because White Leghorns is a layer not a broiler and not at all suitable for backyard poultry; I had detailed discussions with fellow Scientists working in the reputed Institute under ICAR about the availability of the experimental bird WLH broiler in backyard poultry system in Bikaner, but no such birds are either available or maintained under backyard poultry systems.	Many marginal animal raisers keep WLH under backyard poultry system and that is why this investigation was carried out. No doubt females are used as layers, but males are used for meat purpose.
