SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	Overall, the research interpretations and conclusions were fully supported by the experimental data and appropriate methodologies. The following are comments to improve understanding of the article's contents: (1) Abstract: Although they were described in the "Materials and Methods" section, the terms RFD, hRFD, and dRFD should be spelled out since they appear for the first time in the manuscript. (2) Some cited literatures in the text are not listed in the "Reference List" (e.g., c; Bremner and Kenny, 1996; Jackson or Jackson et al., 1973; etc). (3) Very minimal discussion of the "RESULTS" unless this is the format/style (SUMMARY AND CONCLUSIONS) that is required by the journal. See some statements in the text.	1. The said terms were properly spelled out. 2. The following cited literatures were listed in the reference list except Bremner and Kenny, 1996 because it was not included in the research article. 3. I discussed the result part in proper way.
Optional/General comments	Authors should seek the advice of an English editor/proof reader to enhance understanding and clarity of some statements in the text (e.g., mixture of sentence tenses; appropriate use of singular or plural terms; active or passive voice; etc.).	I checked all the grammatical portion appropriately.
