

SDI Review Form 1.6

Journal Name:	International Journal of Biochemistry Research & Review
Manuscript Number:	Ms_IJBCRR_32764
Title of the Manuscript:	Plasma biotinidase as a predictor for hepatic synthetic function impairment
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	See my accompanying comments on separate sheet.	It is OK
<u>Minor</u> REVISION comments	Inappropriate analyses and conclusions with small sample size. Faulty recommendation that is not founded on data or what is known about biotin/biotinidase deficiency.	- I had modified the conclusion. - The small sample size was placed as a study limitation and the following recommendation has been placed: A larger scale studies are recommended to confirm the findings of the present study and to evaluate plasma biotinidase in various liver diseases and correlate its level with the clinical staging of cirrhotic patients. - I remove the old recommendations.
<u>Optional/General</u> comments	See my accompanying comments on separate sheet.	It is OK
