

SDI Review Form 1.6

Journal Name:	International Journal of Biochemistry Research & Review
Manuscript Number:	Ms_IJBCRR_33367
Title of the Manuscript:	Quantitation of TLR-2 mRNA Expression in Bovine Mastitis caused by E. Coli
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	1. Grammatical errors should be fixed throughout the manuscript. 2. Lipoteichoic acid is a major constituent of the cell wall of gram-positive bacteria but not in e-coli as author mentioned it in line no 21 is not acceptable. 3. If TLR genes are expressed in response to teichoic acid than the complete concept of the article goes wrong, as author found e-coli as a causal organism which does not contain teichoic acid in their cell wall 4. Overall the representation of manuscript is poor.	Sincerest thanks for reviewer comments on our manuscript. Grammatical errors have been rectified in the revised version. Though Lipoteichoic acid is a major constituent of cell wall of gram-positive bacteria, some of the research article has also mentioned that the Lipoteichoic acid is constituent of cell wall of gram negative bacteria (Included reference in the revised version). We believe that the manuscript has been greatly improved and hope it meet your approval for publication.
Minor REVISION comments		
Optional/General comments
