

SDI Review Form 1.6

Journal Name:	International Journal of Biochemistry Research & Review
Manuscript Number:	Ms_IJBCRR_34556
Title of the Manuscript:	HPLC profiling of bioactive compounds present in Oleaeuropeae, Myrtuscommunisand Monothecabuxifoliaand their antibacterial activities
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	I showed my corrections on the pdf as notes. There are redactional mistakes which must be corrected. The full text must be read again carefully and all grammer mistakes (it is written "weighted" in the line 99, it should be changed as "weighed") and blanks between words especially in the genus names must be corrected. Discussion need to be improved. Results of the analyses of other researchers must be given and discussed with their own results. Found higher or lower than their own results, and the possible reasons must be pointed Total polyphenols and total phenolics are analysed, Total polyphenols contain also total phenolic acids. Besides, methods are nearly the same (both folin ciocalteu, differing from each other in very small details) and it is hard to tell the difference between them. It is not necessary to do both of them.	The correction suggested in the pdf version have been incorporated accordingly. Attempt have been made accordingly. Hope it will be ok now The topic have been deleted accordingly.
<u>Minor</u> REVISION comments	1. In the heading there must be a blank after <i>Myrtus communis.</i> and <i>Monotheabuxifolia.</i> 2. In the heading, word "profiling" should be changed as "profile". It is a better usage. Heading is a little bit poorly written, it can be rewritten in a different way. For example; "HPLC profile of the bioactive compounds of ... and their antibacterial activities."	Corrected accordingly Corrected accordingly
<u>Optional/General</u> comments
