PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	1. There is very little evidence of problem diagnosis and solution in the manuscript. 2. This tends to limit the value of the research to modern applied research 3. The research would have made a positive contribution had it dwelt with remediation issues for example how could the ingress of heavy metals be controlled at the areas of study?	Remediation was not part of the work but the observation is noted. No data of such exits in the study area thus the aim of the work was to provide data which could provide basis for further actions.
Minor REVISION comments		
Optional/General comments		The authors thank the reviewer for the invaluable observations.
