

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of Biochemistry Research & Review
Manuscript Number:	2014_IJBcRR_14413
Title of the Manuscript:	Weekly occurrence of <i>Gymnodinium catenatum</i> and Paralytic shellfish Poisoning in the Mediterranean shore of Morocco
Type of article	Original research paper

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The authors have done a good job of addressing the previous comments and revising the manuscript. There are still minor issues with the editing and grammar of the manuscript, but that is something that should be addressed by the journal editors. There are a few minor issues that still need correcting but overall the recommendation is for publication. Several minor corrections that should be made prior to publication: 1. Section 2.3: change "saxitoxine" to "saxitoxin" 2. Change "epuration" to "depuration" 3. Identify the source of the saxitoxin standard used for the mouse bioassays 4. Section 2.4.1: change "stanrdads" to "standards" 5. Figure 1: There are white patches in the blue background for the lower map. 6. Figure 2: The sampling dates on the X axis are in yellow and difficult to read. 7. Throughout text: change "decarbamoys" to "decarbamoyl" 8. In references: Vale and Taleb (2005) reference is incomplete.
