SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	For abstract the results should have been shown there clearly to get a general idea about the work. The abstract also needs a proper presentation as it seems too much jumbling. For introduction the importance of the work must be mentioned as the introduction is way too short. For methodology it is not for scientific article as there is no need of discussing anything in the methodology part. Directly come to the methodology and discuss it in a brief manner and make it presentable. For results are not much of any scientific importance. Statistics part should be carried out again and results should be elaborated as to how you have got the results. The result are very short and does not show any significant achievement. Besides the results and discussion should be merged.	
<u>Minor</u> REVISION comments	The overall manuscript as a whole should be formatted as per the template and the paper has no formatting at all. It needs minor revision.	
<u>Optional/General</u> comments
