**PART 1: Review Comments**

|                                            | Reviewer's comment                                                                                                                                                                                                                                                                                                                                                     | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|--------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b><u>Compulsory</u></b> REVISION comments | <p>In the first line of abstract you should start in expanded form i.e., Type 2 diabetes mellitus (T2DM)</p> <p>Introduction- Need to improve the writing in giving correct information regarding the role of IL-10.</p> <p>When you giving the short form first time, that should be expanded form.</p>                                                               |                                                                                                                                                                               |
| <b><u>Minor</u></b> REVISION comments      | In Discussion 2nd para- urinary albumin excretion rate (UAER) – Should change the font size                                                                                                                                                                                                                                                                            |                                                                                                                                                                               |
| <b><u>Optional/General</u></b> comments    | <p>This work is very much useful to the society.<br/>Work done well</p> <p>But authors should read again the full paper and should check the sentences are correctly framed and giving the easy understating of the findings.</p> <p>At least Introduction and methodology should be rewrite.<br/>In conclusion, 2<sup>nd</sup> point need the check the wordings.</p> |                                                                                                                                                                               |
