

SDI Review Form 1.6

Journal Name:	<u>International Journal of Biochemistry Research & Review</u>
Manuscript Number:	Ms_IJBCRR_35040
Title of the Manuscript:	Substrate mass conservation in enzyme catalyzed amyolytic activity
Type of the Article	Short Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The manuscript entitled "Substrate mass conservation in enzyme catalyzed amylolytic activity", is interesting and reports some novelties in the field of starch hydrolysis by amylases. I think that authors succeeded to fulfill the aims, which they put for this research, experimentally and mathematically. I would suggest to authors, to re-read their manuscript and carefully correct several syntax errors, and moreover, to cite some pioneer theoretical works which have been published (not only those referred to amylolytic enzymes).	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
