

Editor's Comment:

I have read the paper and I have gone over the reviewers comments. The reviewer Dr. Masako Shimada provided very specific revision (fix legend to Fig. 7 and cite and discuss an important paper in the literature) that the authors failed to address. Consequently, this reviewer feels strongly that the paper should be rejected in its current form. I am in agreement with Dr. Shimada's assessment of the paper, it should be rejected in its current form. If the authors agree to carry out the revision requested by Dr. Shimada, I would be in favor of publication.
