PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The authors added some references in the Discussion section but didn't answer my questions about the methods for counting WBC. Please indicate the reference for the methods. The reference format is not uniform. Please check the reference format, for example the followings. In References Cerenó,: Only last name but not given name Journal of Current Science, 7: 23-31: Journal Some journals are italicized but some are not. Please unify them. Journal of Natural Sciences Research, Vol.5, No.4, 37- 42: some have vol but others not Journal of Veterinary Medical Science/ the Japanese Society of Veterinary Science, 77 (8), 913- 918.: Should be changed into Journal of Veterinary Medical Science and delete the Japanese Society of Veterinary Science Gumboro : delete the space between Avian diseases, 35(3): Some have number () but some do not. 2015).Effects: add a space between Sure, the authors should check the ms carefully but not just those the reviewer indicates.	Thank you so much for the positive observations, it was an oversight. The corrections has been effected in the text as suggested and the reference was 'Cray and Zaias, 2004' Noted
