PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	It is a poor written manuscript dealing with a topic with a lot recent literature data from large clinical trials.	The author thanks the reviewer for his valuable impressions. The intension of the article is to propose a new hypothesis and is not intended to review the whole literature, relevant and irrelevant. However justice is done to compress relevant information in introduction and discussion parts to show that the authors approach is on different footing. The reviewer is requested to once again not to view the article as an attempt to review or give an over- view on the matter. Some parts of the article are re written/ reorganised and hope that article meets the expectations of the reviewer.It is requested that the article may be facilitated for publication. Regards Sir.
<u>Minor</u> REVISION comments	Jj787uJj787u7uui	
<u>Optional/General</u> comments
