PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Line 80: It is unscientific to use "elsewhere" in citation (see also line 103). Mention the statement of plant's identification and reference voucher number for the authentication of the sample. Line 94: State the authority from which the ethical clearance for using laboratory animals for experimentation was obtained. Line 181 to 183: Place the calculations appropriately. Authors should either find a way to insert the values in tables or move the calculations to methodology section. Line 194,205 and 216: Insert the unit of values on the y-axis in the figure. Line 397: Use Vancouver style of citation throughout the manuscript. Please clarify the ethical issue if any.	- The sentence "elsewhere" duly replaced appropriately. And statement with respect to plant identification, inserted accordingly - Adamawa State University, Mubi (ADSU) ethics committee's guidelines for the care of laboratory animals (IACEC/CHM-A045/2016) - The calculations according the recommendations accordingly The values for the y-axis in the figure inserted accordingly - Citation modified accordingly
Minor REVISION comments	Line 188: Use "...result..." Line 19: Use "...aqueous leaf extracts of <i>J. gossypifolia</i>..." Line 87: Use "Wistar" Line 276: Use "differ" NOT "defer" Line 280, 406 and 413: Consider the plural of "leaf" as "leaves" NOT "leave". Crosscheck the entire manuscript for the correct spelling of the word. Line 307 and 391: Give the full meaning of the acronyms TLC and ROS in its first appearance in the manuscript.	- The word..."results" is corrected - The word leave replaced with leaf extracts of <i>J. gossypifolia</i> - Proper spelling for Wistar inserted - The word differ inserted accordingly - All words "leave" replaced with leaves accordingly - Full meaning of the acronyms TLC and ROS inserted on first appearance - Copy of the ethical approval scanned along
Optional/General comments	Provide a scan copy of ethical approval for animal experimentation Reconcile the spelling of the plant's species name in the title and the spellings used in the texts of the manuscript	Reconciled
