

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of Biochemistry Research & Review
Manuscript Number:	Ms_IJBCRR_41714
Title of the Manuscript:	Nutritional and Phytochemical Composition of Vitellaria paradoxa (Shea fruit pulp)
Type of Article:	

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>The author needs to follow through the comments and address the concerns raised.</p> <p>The author needs to give a brief overview of how the individual methods were carried out and then reference. The authors should also include the formulas that were used in calculation. For instance, If it is protein content specify did you use Khedjal or biuret's test? And give the formula that was used for calculation of protein. Same for lipid extraction it can be done using several standard methods, which specific one did you use? Kindly add more information to the introduction on the nutrition status of Nigeria. The information is available on FAO or WHO website for free. Using more recent statistics on the nutrition status, will improve the significance and quality of your paper.</p>	<p>1. The detail methods of proximate and phytochemical analyses has been provided</p> <p>2. Summary of nutritional status of Nigeria has been incorporated into the write-up</p>
