

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of Biochemistry Research & Review
Manuscript Number:	Ms IJBCRR 41986
Previous Title of the Manuscript:	Temporal and spatial changes in host defense enzymes in response to <i>Fusarium wilt</i> in Pigeonpea (<i>Cajuns cajan</i> (L.) Millspaugh)
New Title of the Manuscript:	Temporal and spatial changes in host defense enzymes in response to <i>Fusarium wilt</i> in Pigeonpea (<i>Cajuns cajan</i> (L.) Millspaugh)
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Article is accepted for publication. Majority of corrections were done on the document along with the comments related and were jotted below too for author's reference.	All the corrections and comments have been now incorporated.
Final Re-review comments on June 18, 2018: 1) Please check for spacing between the lines, whether it is double line spaced or single line spaced throughout the text. 2) Please express the Xg units in rpm (revolutions per minute) and Also please make corrections in unit to either "h" or "hours" as "h" is the universally accepted unit for hour (s). 3) Please express the exact dilution rate or ratio of the enzyme extract, in place of suitably or twice. 4) Please remove the space below the table 1 and between table 1 and the corresponding table 1 legends. Made corrections for Table 1, 2, 3,4 and 5. 5) Missing information for S1, S2 and S3 stages below Table 4. Missing Figure 4, but its title is similar to Table 4 and the legends, might have been a typo error. Corrected. 6) In Discussion, 4.1, at the end of the paragraph 2: Please check for p values and CV or LSD which is required for the comparison of varieties and significance; significance was not mentioned anywhere except here, without indicating the per cent significance. Without publication of the results, the data is not supposed to disposed of. Please insert the per cent significance at least the p value where you got these results significantly true, like P= or less than 0.01 or 0.001 or 0.05. 7) Please incorporate the expanded version of BTH in para 4.2 of discussion. 8) Please insert a sentence in conclusion, about spacial and temporal variations for disease resistance and induction of genes conferring <i>fud</i> disease resistance in pigeonpea.	1) Spacing between the lines is now uniform throughout the text. 2) Xg units is now expressed as rpm (revolutions per minute). For "hours" the universally accepted unit "h" have been used in the document. 3) exact dilution rate of the enzyme (1:1) has been now used 4) Space removed as suggested 5) Missing information is now corrected. 6) In Discussion, 4.1, at the end of the paragraph 2: the percent significance has been used 7) Expanded version of BTH included in para 4.2 of discussion. 8) A sentence included in in conclusion as suggested.
