PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	The manuscript is engaging and in general, the experimental setup is sound and data has been appropriately analyzed. However, I do have several comments and suggestions. The quality of English is very poor and cannot be acceptable in its current written form with lots of grammatical error. -.428, -.297, .219 etc should be -0.428, -0.297, 0.219.. non-insulin dependent diabetes mellitus (NIDDM) is no longer in use nowadays.	Ok noted.
Optional/General comments
