PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	The study presented in the manuscript n.Manuscript Number: Ms_IJTDH_41814 entitled "Radiation Protection: What Do The Nigerian Pediatric Residents Know?" is interesting but limited, the number of pediatricians interviewed is low, it could also be supplemented by the interview of doctors and staff of radiology and diagnostics using ionizing radiation as investigators. The manuscript therefore appears more as a document of denunciation than as a true scientific article. There are many typos in the text. The bibliography should be formatted in the spaces.	Thank you very much for this observation. The small number of paediatricians used was due to the fact that the questionnaires were administered during an update course held at the university of Benin teaching hospital and we could not determine the number of respondents that came for the update. We hope to do more research in this aspect sometimes later and in that we could recruit more respondents than we did in this one.
Optional/General comments
