

SDI Review Form 1.6

Journal Name:	<u>International Journal of Biochemistry Research & Review</u>
Manuscript Number:	Ms_IJBCRR_35257
Title of the Manuscript:	Hepatic lipase influences plasma lipid profiles and lipoprotein ratios in Lagos University Teaching Hospital patients with Ischemic stroke
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The paper cross analysed hepatic lipase (HL) activity in relationship with clinical outcomes (healthy versus ischemic stroke). The key lecture was statistical interpretation of quantitative lipid derived biochemical data. Clinical description of patients is poor; ATP III references do not apply correct in terms of gender. Lipid parameters proposed are obsolete and difficult to obtain for practitioners . The title doesn't reflect main results and the reinterpretation of results and final message in discussion not clear to the author	
<u>Minor</u> REVISION comments	English language was generally not always appropriate Statistical method was not always clear and generally redundant	
<u>Optional/General</u> comments
