

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of Biochemistry Research & Review
Manuscript Number:	Ms_IJBCRR_40959
Title of the Manuscript:	PHYTOCHEMICAL SCREENING AND ANTIMICROBIAL ACTIVITY OF LEAVES AND STEM-BARK AQUEOUS EXTRACTS OF DIOSPYROS MESPILIFORMIS
New title of the Manuscript:	PHYTOCHEMICAL SCREENING AND ANTIMICROBIAL ACTIVITY OF LEAF AND STEM-BARK AQUEOUS EXTRACTS OF <i>DIOSPYROS MESPILIFORMIS</i>
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>The work has improved a lot with the information included, but it can further improve:</p> <p>1) Check the references (in some parts included there is no bibliographic reference);</p> <p>2) Long paragraphs (some paragraphs got too long, reshape so you have smaller paragraphs and clearer information);</p> <p>3) Link between information and organization of ideas (lots of information was included throughout the text and their sequence is not great, reread the whole text and try to make it more cohesive and more fluid throughout the reading);</p> <p>4) Explain in the text because the aqueous extract was used (there is evidence that the ethanolic extract has activity, entertained, due to environmental issues, it was chosen to make the aqueous extract, etc.) and if this could have a negative impact on the results;</p> <p>5) Since you did not do statistical analysis, include this as a limitation of the work in the discussion.</p>
