SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of Biochemistry Research & Review	
Manuscript Number:	Ms_IJBCRR_44205	
Title of the Manuscript:	Phytoremediation of Crude Oil Polluted Agricultural Soil Using Schwenkia americana and Spermacoce ocymoides	
New title of the Manuscript:	Phytoremediation of Crude Oil Polluted Agricultural Soil Using Schwenkia americana L. and Spermacoce ocymoides Burm. f.	
Type of Article:	Original research papers	

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
1. The article was much improved.	
2. The justification of moisture evaluation was not given.	
3. Our concern about the detailed procedures was specifically needed for the remediation process. Hence the author is not likely to give the details of Kjeldahl procedure (e.g. running of tap water for the condenser. This is a scientific paper and not a procedure for 1 st year chemistry students.	
4. The authors need to convince the reader about the importance of moisture evaluation. Perhaps the whole section of moisture may be deleted without affecting the strength of the article.	

Reviewer Details:

Name:	Mahmood M. Barbooti
Department, University & Country	University of Technology, Iraq
