

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of Biochemistry Research & Review
Manuscript Number:	Ms_IJBCRR_43796
Title of the Manuscript:	Evaluation of nutritive value of two traditional African vegetables (<i>Corchorus olitorus</i> and <i>Hibiscus sabdariffa</i>) commonly consumed in Côte d'Ivoire.
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The authors improved their manuscript, and they did most of the suggestions. Although, a few new revisions need to be done by the authors, namely: Keywords: I suggest to remove "food security" Material: I suggest the authors do not begin the sentence with "these plants" and refer the names of plants. Results: Line 101: Remove "highly" Line 104: Clarify meaning of "had good energetic value" Discussion: Line 167: Correct the sentence. References: Authors again need to standardize references, for example: - Number of pages were not correct, because in some references authors mentioned all number example (ref 38 "117–185") and in others only last numbers (example: Ref. 41 "250-55.") - The abbreviations of some journals are wrong: Ref 25, 27 and 30. English should be improved.	Keywords: Food security remove Material: <i>Corchorus olitorus</i> and <i>Hibiscus sabdariffa</i> Results: Line 104: good source of energy Discussion: Line 167: The mineral contents in the two leaves differed from the values reported by Agbo <i>et al.</i> [32].
