PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	The study is well planned and executed. Still few corrections need to be carried out 1. Include ethical approval certification also for publication. 2. The study is not significant, because the drug at 2mg /kg concentration completely inhibited the pathological condition but the plant extract at 100 mg/kg reduced the pathological condition at 50% of the drug condition... so gives discussion accordingly. 4. Don't start any sentence with numbers.	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
