SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	<p>I think these case reports are very important in the era of 2nd generation TKIs regarding their rare adverse events.</p> <p>I have one major question: Why did you start imatinib after the cardiac event of nilotinib? Because you have mentioned that the patient was resistant to imatinib therapy. So, why did you start dasatinib/bosutinib?</p>	<p>-I think also like that.</p> <p>-It is a typing error. In fact, the patient is switched to dasatinib.</p>
<u>Minor</u> REVISION comments	<p>Line 65: PDGFR). → PDGFR).</p> <p>Line 104: occuuring → occuring</p> <p>And please write all references in a uniform style. For example you used italics in some places.</p>	<p>-The sentence is modified.</p> <p>-this is corrected in the text.</p> <p>-References are corrected and written in a uniform style.</p>
<u>Optional/General</u> comments		

As per the guideline of editorial office we have followed VANCOUVER reference style for our paper.
