|---|---|
| <ul style="list-style-type: none"> - Should talk about thyroid MCL in the abstract intro. - The authors need to justify better their treatment choice: plain R-CHOP for a stage IV, mostly extranodal MCL is considered suboptimal by most experts. In their response to comments the authors state that the patient refused autograft and the CNS prophylaxis was given. These pieces of information should be contained in the manuscript. - Consent form is not acceptable. There is no signature. - Figure 2 appears incomplete? As presented, it is not explicative... | <ul style="list-style-type: none"> -a sentence about thyroid MCL is added -these informations are added in the manuscript -Consent form is scanned -Figures are modified. |
