**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments	<p>1. The paper needs to English-language proof edited. The authors must submit this to the editor.</p> <p>2. The paper provide inconclusive evidence, but still warrants publication. It does identify the high incidence of trigger points in the teres major. A collaborative effort of physical therapy and massage increases the success of the therapeutic attempt. This was the primary research question.</p> <p>3. The drop out can not be attributed to the authors.</p> <p>4. The methodology was sound, like wise the statistics was well thought off and clinically valuable.</p> <p>The aforementioned reasons, I recommend the paper for publication after the English-language proof certificate has been submitted to you.</p> <p>Thank you for considering me to this review this valuable and cutting edge piece of work.</p>	<p>The test has been entirely edited by a professional. I enclose his certificate.</p>
<b><u>Minor</u></b> REVISION comments		
<b><u>Optional/General</u></b> comments
