SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	A good study suggesting that adding functional massage to routine physiotherapy for management the Subacromial impingement syndrome provides functional benefits. However, I have the following suggestions: <ol style="list-style-type: none"> 1. Can the topic change to “Functional massage of the teres major muscle in patients with subacromial impingement syndrome: A randomized controlled case series study”? 2. Add “Functional massage” to key word. 3. Can you be specific about the therapeutic exercise, frequency, dosage and duration? 	
Minor REVISION comments	Some typos	
Optional/General comments
