**PART 2:**

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
I don't see much improvements compared to the previous versions. Added paragraphs generally carry the same flaws as the unchanged paragraphs. My previous comments are still valid. I also wish to stress that when I say that something is not clear in the manuscript, it is not enough to explain it in "author's response to evaluator's comments" – the point is that it needs to be explained in the manuscript itself.	The materials and method including the results sections have been amended to reflect the evaluators' earlier and final comments. See the new corrections in the manuscript.
