

Editor's Comment:

The final decision for manuscript number Ms IJPSS 25339 entitled 'Dynamics of Soil Carbon, Nitrogen and Soil Respiration in Farmer's Field with Conservation Agriculture, Siem Reap, Cambodia' written by Don Immanuel A. Edralin, Gilbert C. Sigua, and Manuel R. Reyes

Following evaluation of all documents related to the manuscript I agree with the Reviewers and Editor that the text is acceptable for publishing in the International Journal of Plant and Soil Science. The text is corrected in accordance with suggestions and requirements of the Reviewers. However, additional minor correction is still needed.

1. All keywords must be changed because keywords should not be the same as words used in a title. Now all keywords are the same as words in the title.
2. The lines (rows) and columns denoted as 'Mean' must be removed from Table 3 and 4. A calculation of means from different experimental variants is unacceptable.
3. According to the Journal requirements a paragraph AUTHORS' CONTRIBUTIONS should be added after Conclusion.

My decision is: Accept after minor revision.
