

Editor's comments:

I checked the manuscript dealing with the topic of GIS systems. The authors corrected the manuscript, nevertheless the text on the rows 35 - 53 must be corrected one more time. I do not understand this part (different script font and size, no continuity between sentences etc.).

Author's feedback:

I corrected the text on the rows 35-53 also the font reformatted. The text is considered as review of literature (previous work done)
