

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of Plant & Soil Science
Manuscript Number:	Ms_IJPSS_27718
Title of the Manuscript:	Antimicrobial effects of four plant extracts against post harvest spoilage fungi of yam (<i>Dioscorea rotundata</i> Poir).
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>I have read through the revised manuscript and have observed that all corrections have been done well.</p> <p>However, I disagree with the calculations for the said concentrations of the plant extracts, unless it is backed by literature. Those percentages (100%, 50%, 25% and 10%) do not represent the actual concentration of the plant extracts in the preparations. Do you mean to say that 20g of powdered plant extract in 100ml of ethanol is 100% concentration of the extract in solution?</p> <p>The focal point of the work is on the plant extracts. So the paper should give correct information of concentrations used.</p>	<p>More detailed methodology has been given in the article and the required corrections carried out. More literatures has also been added.</p>
