

Editor's comments:

Listed below are my minor comments.

1. In Line 5 of the abstract, please change "were;" to "were:".
2. No experimental dates have been stated in Section 2.2 or 2.3. How long did the experiment last? I noticed you mentioned in the Fig. 1, which is from March 22 to April 3, 2015.
3. The words in the text are too close together to read.

Author's feedback:

In line 5 of the abstract- noted and attended to, refer to the highlighted text.

No experimental dates- dates have been inserted and highlighted (sections 2.2 and 2.3).

The words in text are too close together to read- we are guided by the provided IJPSS template.
