

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of Plant & Soil Science
Manuscript Number:	Ms_IJPSS_26327
Title of the Manuscript:	EFFECT OF CONSERVATION TILLAGE ON THE SOIL PHYSICAL AND MECHANICAL PROPERTIES
New title:	EFFECT OF CONSERVATION TILLAGE ON THE SILTY-CLAY-LOAM SOIL PHYSICAL AND MECHANICAL PROPERTIES
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<ul style="list-style-type: none"> • The authors changed the title without citing any reason. They may retain the original title. • I still do not understand the result or conclusion of this paper. The conclusion they had given could be predicted from the papers cited understanding the nature of the soil of the region. • The authors had mentioned some effect on the soil physical and mechanical nature of the soil by the tillage methods, but they didn't mentioned which tillage method is good for the soil of the region and at what depth, and which tillage method they are recommending for the region.
