

### **Editor's Comment:**

Manuscript Title: The historical interpretation of the interactions between plants-herbivores: an methodological exercise with the genus Piper

Type of Article: Short communication

I observed that this paper is still written in poor English. For example: In the Title: It should be 'A' not 'an'

In the Abstract: In this study we 'developed'

The pubescent and disturbance 'were'

It could be assumed that pubescent.....but probably 'has' an adaptive value.

We 'concluded' that.....

For the explanation of phenomena (remove 'and'), we show a simple.....inferences 'in order to' generate.

In Introduction:

Line 4: The knowledge which the.....

Line 11: .....nevertheless, it is very limited 'in' the.....

Line 25: In this study, we 'developed'

M

In Methodology:

For this interpretation, exercise, we 'selected'.....and 'associated'

All these and many other throughout the script should be corrected before acceptance.

Probably, the script should be given to English Editors to improve on the quality of the paper and as well give credence to the journal.
