

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of Plant & Soil Science
Manuscript Number:	Ms_IJPSS_30111
Title of the Manuscript:	Genetic Diversity and Variability among Papaya (Carica papaya L.) Genotypes using Multivariate Analysis
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Only 40% of my suggestions have been taken into account. It is imperative to prepare a table to present the accessions studied and mention the type of sex of each one. Ocampo et al. (2005) is not mentioned nor included in the discussion.	A table showing the performance of the accessions studied is already included. The accessions were either females or bisexual plants. The evaluation for sex type for each genotype was not performed during the study. Ocampo et al 2006, 2007 has being referred to in both introduction and discussion.
