**PART 2:**

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Many of the suggestions/corrections were not done. Reference style not change according to this journal's requirements. Also abstract and P-value formats. This study seems to be still running (2016-2017) so it should be called 'preliminary results'. Or wait till the end of the year and report on the completed study. Please check track changed in attached paper.	All the comments were corrected and regarding the comment about "this experiment is still ruining", I would like to say that it's already finished.  The corrected comments are marked red.
