

Editor's Comments:

- No "Materials and Methods"
- No "Results and Discussion"

Introduction

- The Justification and Objective(s) of the study are absent!

Referencing

- In text referencing, e.g. ...pumped outlet, [1]
The 'coma' should be removed after outlet.
- Main Reference Section:
E.g. Ref. Nos. 1, 2, 3 and 4 are not well done.

Figures and Tables

Figures and Tables should be written in the text as:

- Figure 1; Table 1 but not as figure 1; table 1

DECISION

The author(s) should take pains to look at the style of the Journal and conform.
Samples of published articles should act as guide.

Authors Feedback:

Item 3 in the paper (SPREAD SHEETS FOR LATERALS SPACING DESIGN OF STEADY STATE SUBSURFACE DRAINAGE SYSTEMS) is the required section of "Materials and Methods". This item includes the software and the equations employed to get the spread sheets design for lateral spacing. Also, a hypothetical case for applying the spread sheets design is included and discussed.

"Results and Discussion" is added and highlighted in yellow (Item 6).

The Justification and Objective(s) of the study are added and highlighted in yellow (Item 1).

Ref. Nos. 1, 2, 3 and 4 are well rewritten and highlighted in yellow. Also, all ref. are reviewed and a few modifications are highlighted in yellow (Item 8).

Figures and Tables are done as required and highlighted in yellow.
