

**SDI Review Form 1.6**

Journal Name:	<a href="#">International Journal of Plant &amp; Soil Science</a>
Manuscript Number:	Ms_IJPSS_37222
Title of the Manuscript:	Correlation and regression analysis of various viability and vigour parameters in coriander ( <i>Coriandrum sativum</i> L.)
Type of the Article	Original Research Article

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<ol style="list-style-type: none"> <li>Suggested title "Correlation and regression analysis of viability and vigour in coriander (<i>Coriandrum sativum</i> L.) seedling establishment"</li> <li>In the text, citations should be indicated only by the reference number in brackets [3].</li> <li>Experimental design was not given</li> <li>How many replicates were taken, &amp; if three why?.</li> <li>Key words has Foliage cuttings, but nothing on Foliage cuttings</li> <li>Key words has Growth regulators but nothing on Growth regulators except Dehydrogenase activity. What are the Growth regulators related to this paper.</li> <li>Two PGRs namely NAA and GA3 each at 50 66 ppm and a control (water spray) were used as treatments at the time of 50% flowering. Results were not given.</li> <li>Keep consistency eg table 1. Table 2, table 3. Table 4 .....</li> </ol>	<p>Corrected</p> <p>Corrected</p> <p>Corrected</p> <p>Yes, three replication were taken due to overcome the variation</p> <p>Data of foliage cutting are presented in terms of correlation and regression</p> <p>Growth regulators data are presented in terms of correlation and regression</p> <p>The growth regulators sprayed at 50 % flowering and their interaction results with the genotypes are given in table 1 and 2.</p> <p>Correlated</p>
<b>Minor</b> REVISION comments	Revisions has to be done as above comments	Corrected
<b>Optional/General</b> comments	Some statements were confused.	Corrected
