**PART 2:**

<b>FINAL EVALUATOR'S comments on revised paper (if any)</b>	<b>Authors' response to final evaluator's comments</b>
If the study was carried out on the results of the interaction between both the effect of foliage cutting and the effect of the addition of plant growth regulators in four genotypes, then this must be highlighted in the abstract. Take into account that the abstract must be able to stand on its own.	<b>Corrected</b>
The aim of the study must be writing in a proper manner.	<b>Corrected</b>
For every acronym used the respective meaning must be given.	<b>Corrected</b>
The writing of the first paragraph of Introduction is clumsily.	<b>Corrected/ added</b>
A proper discussion of results, including interpretation of the own results, contrasting of data, explaining the own findings with previous reports as need, as well as the importance and impact of their own work must be done. I found no change in discussion.	<b>Corrected</b>
The same inconsistencies were found in the manner to present the references.	<b>Corrected</b>
