

SDI Review Form 1.6

Journal Name:	International Journal of Plant & Soil Science
Manuscript Number:	Ms_IJPSS_35590
Title of the Manuscript:	INFLUENCE OF SULPHUR AND ZINC LEVELS ON GROWTH, YIELD AND QUALITY OF SOYBEAN (Glycine max L.)
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The manuscript is perfectly written in both grammar and analysis. It drew significant conclusion and discussion such as Application of sulphur and zinc increased all the growth and yield attributes of soybean but significant increase up to 40 kg S ha ⁻¹ and 30 kg Zn ha ⁻¹ 11 were observed in plant height, number of branches plant ⁻¹ at all stage, grain yield kg ha ⁻¹ 12 , increased 13 the protein content in grain of soybean. Therefore, it needs to add a figure.	
Minor REVISION comments	Authors are suggested to add a figure to better illustrate the uality and uptake of nutrients by soybean as influenced by different 264 levels of 265 sulphur and zinc.	
Optional/General comments	None
