

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of Plant & Soil Science
Manuscript Number:	Ms_IJPSS_35524
Title of the Manuscript:	Cost-Effectiveness and Water Use Efficiency of Groundnut and Wheat under SAT region of Central India
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
For compulsory comments, I am not satisfied with the response. The open conditions in producer's fields can also be evaluated for the second year, the third year, etc. If you do not want to do the statistical analysis, you can still evaluate the findings for each year. You can highlight the same findings for all the study years. You can also try to explain the contrary findings between study years For minor comments, do you mean "all corrections were done."? If so, please mention.	I have done statistical analysis (Standard deviation) of all data as per reviewer comments. I was done my doctoral research work in ICRISAT project. I have discussed with my doctoral advisor for another one or two year data but he declined for another more data because another year data was not in my doctoral research period. All correction is highlighted in yellow colour.
