

SDI Review Form 1.6

Journal Name:	International Journal of Research and Reports in Hematology
Manuscript Number:	Ms_IJR2H_43171
Title of the Manuscript:	HIV Infection and Therapeutic Interventions: Review on HIV Infection Biology, Highly Active Antiretroviral Therapy (HAARTs), Hepatotoxicity, Nephrotoxicity and Dyslipidemia.
Type of the Article	Review article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Lines 39-44: to include sources of information Tables 1 & 2: to include reference number Line 236: what is the consequence of poor adherence to HAART that causes HIV-associated nephropathy? Research in the field of HIV/AIDS is constant and ongoing; a review in this discipline is supposed to full of updates which am afraid is not currently the case. As way out, I would suggest an update of the review - Authors need to thoroughly revise the manuscript for some language issues	Source duly provided Source of tables have been duly referenced. That was a miscommunication. However, it has been resolved and edited. Authors worked on their subject matter Duly revised
Minor REVISION comments		
Optional/General comments	Overall, it would be more-interesting giving detailed mechanisms of HAART-induced toxicity especially at the molecular level.	Molecular mechanisms underlying HAART-induced toxicities will be a topic for another review for a different day
