

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of Research and Reports in Hematology
Manuscript Number:	Ms_IJR2H_45338
Title of the Manuscript:	Interaction between malnutrition and severe malaria
New title of the Manuscript:	Interaction between malnutrition and severe malaria_in children at the National Hospital of Niamey-Niger
Type of Article:	Short Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
There are still a few little things to change within the manuscript. These are as follows: - Manuscript title: The authors have to be replace "in children" by "among" children". Indeed, it is preferable to use "among" as you did not work on all children of Niger (just a sample of them) - The authors have to compute geometric mean parasite density instead of arithmetical upon log-transformation. Indeed, parasite density distribution usually is not consistent with uniform distribution and as a consequence it is impossible to perform statistical tests such as ANOVA, Student, etc. - Specify the role of Dr Jean Testa within the Acknowledgment section. Indeed, in this section it is necessary to specify it (language edition, funding, proofreading manuscript, etc.)	OK. I replace in the title "in children" to "among" children OK. I compute arithmetical mean of parasite density because I did not performed ANOVA and Student test but Mann Whitney/Wilcoxon Test. I specify the role of Dr. Jean Testa within the Acknowledgment. He read and correct the manuscript/
