PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	As per apical size by Kim et al is the preparation done for CI and LI adequate? Is inadequate BMP one of the causes of persistent purulent discharge? Is TAP associated with causing further discoloration of teeth? Would it be a wise choice for already discolored anteriors? If pt was asymptomatic why was TAP placed for further one month? Is the long term use of tetracycline ICM capable of causing any side effects?	
Minor REVISION comments	Retention wire= fixed retainer? Is root zx accurate in the presence of purulent discharge? Why was the radioagraph done later? References- vancouver style	
Optional/General comments	Are these gramatically correct? Are usually a sequel to ...	

As per the guideline of editorial office we have followed VANCOUVER reference style for our paper.
